Settings
Seamless communication with teams
Teams are a great way for groups of people to communicate and work on code together. Take a look at why they're great.
Flexible repository access
You can add repositories to your teams with more flexible levels of access (Admin, Write, Read).
Request to join teams
Members can quickly request to join any team. An owner or team maintainer can approve the request.
Team mentions
Use team @mentions (ex. @github/design for the entire team) in any comment, issue, or pull request.

Select parent team
Team visibility
Visible
Recommended
A visible team can be seen and @mentioned by every member of this organization.
Secret
A secret team can only be seen by its members and may not be nested.
